

You're becoming a pilot. Not a meteorologist.

But weather is **the skill that separates the pilots who make it home** from those who don't. METARs, TAFs, AIRMETs, SIGMETs — all that data, and still one unanswered question: **should I go?** PlaneWX synthesizes every authoritative weather source against your aircraft and minimums into a single, structured answer.

WX SCORE

**The confidence to go.
Or the courage to stay.™**
